Is the increase of +18 red sites unusually large?
9,999 paired count changes · unrestricted shuffles · original blocks unavailable
Shuffled change < +18
Shuffled change ≥ +18
Observed change: +18
Shuffled median: +2
Observed: 158 → 176 (+18)
2,629 / 9,999 shuffles ≥ +18
Upper-tail permutation p = 0.2630
